| Parameter | Rating | Units |
| :--- | :---: | :---: |
| Blocking Voltage | 350 | $\mathrm{~V}_{\mathrm{P}}$ |
| Load Current | 120 | $\mathrm{~mA}_{\mathrm{rms}} / \mathrm{mA}_{\mathrm{DC}}$ |
| On-Resistance (max) | 30 | $\Omega$ |
| LED Current to operate | 2 | mA |

## Features

- $1500 \mathrm{~V}_{\text {rms }}$ Input/Output Isolation
- Small 8-Pin SOIC Package
- TTL/CMOS Compatible input
- Arc-Free With No Snubbing Circuits
- No EMI/RFI Generation
- Immune to radiated EM fields
- SMD Pick \& Place, Wave Solderable
- Tape \& Reel Version Available

## Applications

- Telecommunication
- Security
- Passive Infrared Detectors (PIR)
- Data Signalling
- Sensor Circuitry
- Instrumentation
- Multiplexers
- Data Acquisition
- Electronic Switching
- I/O Subsystems
- Medical Equipment—Patient/Equipment Isolation
- Aerospace
- Industrial Controls

## Pin Configuration

## Description

The CPC2330N is a miniature device with two independent solid state relays, one normally open (1-Form-A) and the other normally closed (1-Form-B), in an 8 -pin SOIC package with $1500 \mathrm{~V}_{\text {rms }}$ of input to output isolation.

The optically coupled outputs, which use IXYS Integrated Circuits Division's patented OptoMOS architecture, are controlled by a highly efficient GaAIAs infrared LED.

Using IXYS Integrated Circuits Division's state of the art, double-molded vertical construction packaging, the CPC2330N is ideal for replacing larger lessreliable reed and electromechanical relays.

## Approvals

- UL Recognized Component: File E76270
- EN/IEC 60950-1 Certified Component: TUV Certificate B 090749410004

Ordering Information

| Part \# | Description |
| :--- | :--- |
| CPC2330N | 8-Pin SOIC (50/tube) |
| CPC2330NTR | 8-Pin SOIC (2000/reel) |

Switching Characteristics of Normally Open Devices

Switching Characteristics of Normally Closed Devices

Absolute Maximum Ratings @ $25^{\circ} \mathrm{C}$

| Parameter | Ratings | Units |
| :--- | :---: | :---: |
| Blocking Voltage | 350 | $\mathrm{~V}_{\mathrm{p}}$ |
| Reverse Input Voltage | 5 | V |
| Input Control Current <br> Peak (10ms) | 50 | mA |
| Total Power Dissipation ${ }^{1}$ | 1 | A |
| Isolation Voltage, Input to Output | 600 | mW |
| ESD Rating, Human Body Model | 1500 | $\mathrm{~V}_{\text {rms }}$ |
| Operational Temperature | -40 to +85 | kV |
| Storage Temperature | ${ }^{\circ} \mathrm{C}$ |  |
| Soldering Temperature (10 Seconds) | -40 to +125 | ${ }^{\circ} \mathrm{C}$ |
| 1 |  |  |

Derate linearly $5.0 \mathrm{~mW} /{ }^{\circ} \mathrm{C}$

Absolute Maximum Ratings are stress ratings. Stresses in excess of these ratings can cause permanent damage to the device. Functional operation of the device at conditions beyond those indicated in the operational sections of this data sheet is not implied.

## Electrical Characteristics @ $25^{\circ} \mathrm{C}$

| Parameter | Conditions | Symbol | Min | Typ | Max | Units |

## Manufacturing Information

Moisture Sensitivity

All plastic encapsulated semiconductor packages are susceptible to moisture ingression. IXYS Integrated Circuits Division classified all of its plastic encapsulated devices for moisture sensitivity according to the latest version of the joint industry standard, IPC/JEDEC J-STD-020, in force at the time of product evaluation. We test all of our products to the maximum conditions set forth in the standard, and guarantee proper operation of our devices when handled according to the limitations and information in that standard as well as to any limitations set forth in the information or standards referenced below.

Failure to adhere to the warnings or limitations as established by the listed specifications could result in reduced product performance, reduction of operable life, and/or reduction of overall reliability.

This product carries a Moisture Sensitivity Level (MSL) rating as shown below, and should be handled according to the requirements of the latest version of the joint industry standard IPC/JEDEC J-STD-033.

| Device | Moisture Sensitivity Level (MSL) Rating |
| :---: | :---: |
| CPC2330N | MSL 3 |

## ESD Sensitivity

This product is ESD Sensitive, and should be handled according to the industry standard JESD-625.

## Reflow Profile

This product has a maximum body temperature and time rating as shown below. All other guidelines of J-STD-020 must be observed.

| Device | Maximum Temperature x Time |
| :---: | :---: |
| CPC2330N | $260^{\circ} \mathrm{C}$ for 30 seconds |

## Board Wash

IXYS Integrated Circuits Division recommends the use of no-clean flux formulations. However, board washing to remove flux residue is acceptable. Since IXYS Integrated Circuits Division employs the use of silicone coating as an optical waveguide in many of its optically isolated products, the use of a short drying bake could be necessary if a wash is used after solder reflow processes. Chlorine- or Fluorine-based solvents or fluxes should not be used. Cleaning methods that employ ultrasonic energy should not be used.

IXYS Integrated Circuits Division makes no representations or warranties with respect to the accuracy or completeness of the contents of this publication and reserves the right to make changes to specifications and product descriptions at any time without notice. Neither circuit patent licenses nor indemnity are expressed or implied. Except as set forth in IXYS Integrated Circuits Division's Standard Terms and Conditions of Sale, IXYS Integrated Circuits Division assumes no liability whatsoever, and disclaims any express or implied warranty, relating to its products including, but not limited to, the implied warranty of merchantability, fitness for a particular purpose, or infringement of any intellectual property right.

The products described in this document are not designed, intended, authorized or warranted for use as components in systems intended for surgical implant into the body, or in other applications intended to support or sustain life, or where malfunction of IXYS Integrated Circuits Division's product may result in direct physical harm, injury, or death to a person or severe property or environmental damage. IXYS Integrated Circuits Division reserves the right to discontinue or make changes to its products at any time without notice.

[^1]
[^0]:    1 Load current derates linearly from $120 \mathrm{~mA} @ 25^{\circ} \mathrm{C}$ to $60 \mathrm{~mA} @ 85^{\circ} \mathrm{C}$, and must be derated for both poles operating simultaneously
    2 Measurement taken within 1 second of on-time.
    3 For applications requiring high temperature operation (greater than $60^{\circ} \mathrm{C}$ ) an LED drive current of 4 mA is recommended.
